work

Embark Studios (ARC Raiders) — Dec 2023 -

UX Lead — Stockholm

Leading the UX team of designers and artists for ARC Raiders, an online multiplayer game in the extraction shooter genre. Responsibilities range from planning, estimating and formulating briefs for new incoming features, such as inventory management, reset mechanics and player interactions in-game through HUD to individual contributions in features such as Onboarding and overall Navigation patterns.

Acast — Jun 2020 - Nov 2023

Senior Product Designer — Stockholm

At Acast, I work with products for all the users we accommodate: podcasters, listeners and advertisers. The range of products require understanding the different users' needs and objectives. I am also responsible for the design system to make sure we make accessible, functional components, both in code and design.

Epidemic Sound — Jul 2019 - Apr 2020

Senior Product Designer — Stockholm

Using music in videos and understanding how copyright of music works are quite tricky tasks. My work at Epidemic Sound involved making it easier to use music for video creators and bringing awareness to the talented artists. Some projects involved: establishing a design system, setting up ARIA attributes on the main product and setting up a process for conducting user research.

Mojang (Minecraft) — Sep 2017 - Jul 2019

Experience Designer — Stockholm

At Mojang, I was part of two cross-functional teams redesigning the flows to enter gameplay of two Minecraft versions. The work involved a total remake of in-game menus and developing a design system with design guidelines for all products. As Minecraft is available on console, VR, mobile and desktop, the design system and its components had to be flexible to accommodate all input types and screen sizes. The Java version also features

around 100 languages which had to be accounted for both spatially and copy-wise when designing new features. During my time at Mojang, we also implemented full screen reader support to the launcher, a product I worked as the main designer on.

Ringier — Aug 2017

UX Designer — Helsinki/Zürich

Ringier is one of the biggest media groups in Switzerland and as part of their digitalisation process they were in need of better tools to help them make data-driven decisions. I worked with designing data visualisations for data sets regarding reader engagement and retention for the publication Blick. The team was distributed in four countries.

BMW — Jun 2017

UX Designer — Munich

As part of their initiatives of setting up better processes for software development, I worked with design for an internal platform for documentation and developer tools for embedded systems.

Telenor — Nov 2016 - Apr 2017

UX Designer & Researcher — Oslo

When I joined Telenor, the company had on-going initiatives to go from being a telecom company to becoming a broader Digital Service Provider. I mainly worked with conducting user interviews and usability testing and UI design for two apps within smart transportation and video streaming.

Netlight — Oct 2016 - Jul 2019

Experience Design Consultant — Stockholm

I worked at Netlight as an Experience Design Consultant where I had the opportunity of working with digital products in various industries ranging from automotive to gaming and experiencing multiple organizations.

Volvo — Jan 2016 - Jun 2016

UX Design (Master Thesis)

Qualitative research studies involving qualitiative interviews and testing with drivers using semi-autonomous systems in the XC90. Investigations involved, driving behaviours, trust and overall functionality. A new dashboard interface was designed based on the study findings.

education

Chalmers University of Technology

M.Sc. Industrial Design Engineering
+ Courses in digital development, Interaction Design and programming

Edinburgh Napier University

Experiential Design / Sustainable Design

Stockholm University

Art History I

pro bono project

The Code Pub 2018

A meetup organizing events for women and non-binary interested in tech related topics ranging from coding to design thinking. The aim is to increase the number of women and non-binary in the tech industry and show the many female role models in tech.

Mentor Sverige 2018

It's easy to forget how it was to go through your teenage years. Mentor is a non-profit organization offering mentor programmes for youth aged 12-17 years. I joined as a mentor for a year, during which I got to support a mentee, and also learn more about myself and gain a new friend.

Talk at Hyper Island: UI / UX in games 2019

Held a talk for students at Hyper Island on the topic of UI / UX design in games and how that affects gameplay, providing both broader concepts of game UI strategies as well as practical tools.

side projects

The Yummy Game

To fill my urge for playful coding, I did a weekend project building a JavaScript game for children to make them excited about eating greens. The player can give vegetables and fruits to the cow to eat. The game is hosted here: **lilyekman.se/yummygame**

tools

UI → Sketch | Figma | Adobe XD | Origami Studio | Principle | inVision | Framer

2D Graphics → Photoshop | Illustrator | Pixelmator Pro

Typography Design → Glyphs
Frontend → html | CSS | Javascript | Scripting | React
3D Modelling → Autodesk Alias | CATIA | Blender
Game Engines & UI Frameworks → Unreal Engine | Coherent Gameface | Unity

areas

UI | UX | Product Design | Wireframes | Prototyping | Accessibility | User Research | html | CSS | UI animations & transitions | User flows | Information Architecture | 3D Modeling | Design systems | Design guidelines | Localization (l10n) | Internationalization (i18n)
